CLEAN WATER ACT (CWA) BASE 106
WATER POLLUTION CONTROL PROGRAM
FY2013-FY2014 FEDERAL FUNDING

EXECUTIVE SUMMARY

Goals, Program Objectives, Sub-objectives, and Targets: The program goals for **federal environmental protection Goal 2 (Clean and Safe Water) and related State Department of Health (DOH)** are listed below.

Environmental Health Administration (EHA) Existing Goals, Indicators, Measures of Effectiveness (MOE)

1. State Water Goal:

- **To ensure that Hawaii's coastal waters are safe and healthy for people, plants and animals**
- **To protect and restore the quality of Hawaii's streams, wetlands, estuaries and other inland waters for fish and wildlife, recreation, aesthetic enjoyment and other beneficial uses**

Environmental Indicators:

- **Shoreline postings due to sewage or other water pollution**
- **Percentage of wastewater recycled annually**
- **Wastewater treatment plant operations and maintenance compliance record**
- **Beach closure/warning days annually due to sewage or water pollution**
- **Number of impaired streams listed**

Measures of Effectiveness:

- **Percent of wastewater dischargers in compliance with permits, healthy for people and the environment**
- **Percent of marine recreational sites in compliance with rules**

Environmental Protection Agency (EPA) Existing Goals and Objectives

2. EPA GOALS: EPA Goals from: 2006-2011 Strategic Plan

GOAL 2: Clean and Safe Water

GOAL 4: Healthy Communities and Ecosystems

GOAL 5: Compliance and Environmental Stewardship

EPA GOAL 2 Objectives:

- 2.1. **Protect Human Health**: Protect human health by reducing exposure to contaminants in drinking water, in fish and shellfish, and in recreational waters.
 - Water safe for swimming.
- 2.2. **Protect Water Quality**: Protect the quality of rivers, lakes, and streams on a watershed basis and protect coastal and ocean waters.
 - Improve water quality on a watershed basis.
 - Improve coastal and ocean waters.
- 2.3. **Enhance Science and Research**: Provide and apply a sound scientific foundation to EPA's goal of clean and safe water by conducting leading-edge research and developing a better understanding and characterization of the environmental outcomes under Goal 2.
 - Apply best available science.
- 4.3. **Ecosystems**
 - Protect and restore ecosystems.
 - Increase wetlands.

4.4. **Enhance Science and Research**

- Apply the best available science.

5.1. **Improve Compliance**

- Compliance assistance.
- Compliance incentives.
- Monitoring and enforcement.

5.2. **Improve Environmental Performance through Pollution Prevention and Innovation**

- Prevent pollution and promote environmental stewardship by government and the public.
- Prevent pollution and promote environmental stewardship by business.
- Business and community innovation.
- Environmental policy innovation.

Federal EPA Goal from: 2006-2011 EPA Strategic Plan
Environmental Indicators from: 2010 HIOH-EHA Indicators of Environmental Health
Performance Assessment Measures from: FY 2010 EPA National Water Program Guidance

NARRATIVE

Overview:

For FY 2013-2014, the CWA Section 106 grant Water Pollution work plan focuses on permitting, enforcement and water quality monitoring.

Permitting:

FY2013

The priority for the Permitting Program will be to issue major and minor permits in accordance with the NPDES Permit Issuance Schedule (Attachment 2); re-issue/administratively extend approximately 1300 existing Notice of General Permit Coverages (NGPCs) that will expire in October 2012; and continue the development and implementation of methods to streamline the NPDES Permit and Section 401 WQC issuance processes. The permit issuance streamlining methods include development of online electronic NPDES Permit and Section 401 WQC applications in the Environmental Health Administration e-Permitting Portal; integrating these online electronic applications with the Water Pollution Control (WPC) information management system; development of an internal consistency document; coordinating permit reviews and inspections with the Enforcement and Compliance Section; issuing NGPCs for pesticide discharges to State waters under the proposed Pesticide General Permit; issuing NGPCs for storm water discharges associated with construction activities to Class 1 and Class AA waters under the proposed General Permit for Discharges of Storm Water Associated with Construction Activities; and providing a blanket Section 401 WQC for certain Army Corp of Engineers 2012 Nationwide Permits.

FY2014

The priority for the Permitting Program will be to issue major and minor permits in accordance with the NPDES Permit Issuance Schedule (Attachment 2) and continue the development and implementation of methods to streamline the NPDES Permit and Section 401 WQC issuance processes. The permit issuance streamlining methods include development of e-Permitting Portal “No Exposure” Certification form, Notice of Intent forms, Section 401 WQC application, Section 401 WQC compliance form, and WQC0833 (VGP) notification form. These e-Permitting Portal applications will be integrated with the Water Pollution Control (WPC) information management system. The Permitting Program will continue coordinating permit reviews and inspections with the Enforcement and Compliance Section and issue NGPCs once the NPDES General Permits are readopted.

Enforcement and Compliance:

FY2013

The priority for the Enforcement and Compliance Section will have 50% of major facilities, 20% of minor facilities, 10% of NGPC facilities (industrial stormwater and Phase I construction stormwater); and 5% of Phase II construction stormwater are to be inspected. The State will continue to follow-up on all active consent decrees which include: County of Maui, Hawaii Department of Transportation, and City and County of Honolulu (CCH) consent decrees (CD) which include reviewing and commenting on CD submittals and follow-up inspections. Continue working on NetDMR to allow the CCH to submit their Discharge Monitoring Report (DMR) data electronically to ICIS via NetDMR. Hawaiian Electric Company's six (6) facilities are currently submitting DMR data electronically to EPA and DOH via NetDMR. Several of the individual major facilities (some of which includes CCH, Hawaii American Water Company, Pearl Harbor Naval Shipyard, and NAVFAC Hawaii Wastewater Treatment Plant) and several individual minor facilities are testing NetDMR and will hopefully be able to submit electronic DMR data by the end of fiscal year 2013.

FY2014

The priority for the Enforcement and Compliance Section will have 50% of major facilities, 20% of minor facilities, 10% of NGPC facilities (industrial stormwater and Phase I construction stormwater); and 5% of Phase II construction stormwater are to be inspected. The State will also oversee MS4 audits of the University of Hawaii, Army Department of Public Works and City and County of Honolulu. The State will continue to follow-up on all active consent decrees which include: County of Maui, Hawaii Department of Transportation-Airports and Highways, and City and County of Honolulu (CCH) global sewer consent decrees (CD) which include reviewing and commenting on CD submittals and follow-up inspections, Hawaii American Water administrative orders, Marisco CD, Waimanalo Gulch Sanitary Landfill EPA Administrative Order [REDACTED]

[REDACTED]. The Enforcement and Compliance Section will continue pursuing [REDACTED]

[REDACTED] Hawaii Institute of Marine Biology is the most recent permittee to start using NetDMR. Hawaii American Water Company will be implementing a new SCADA system by the end of June 2013, which will enable them to batch data via NetDMR. The Enforcement and Compliance Section will be working with Windsor Solutions on several projects: 1) Flowing data from DOH's data system, Water Pollution Control (WPC), to ICIS. Currently data is flowing from WPC test to ICIS batch test; 2) working with other Branches within the Environmental Health Administration to reconcile facility data on the Environmental Health

Warehouse, which was released to the public at the beginning of March 2013; 3) helping develop a public inquiry application which will help reduce the amount of Requests for Government Records that the CWB receives.

Water Quality Monitoring and Assessment:

FY2013

Priority of the Monitoring and Analysis Section will be BEACH Monitoring and Notification, transitioning into the new EPA Recreational Waters Criteria, completion of the Lahaina Seep Sampling by December 30, 2013, and qPCR and pharmaceutical projects at Hanalei, Nawiliwili, and Lahaina by December 30, 2013. The qPCR and pharmaceutical work will complement and further refine the nutrient and waste water source tracking methodology (Kualoa Protocol) of the CWB. Monitoring will gear to support our TMDL, 303d impaired waters and WQ standards programs.

In March 2013, CWB Monitoring and Analysis section staff attended the R Statistical Software training at EPA Office of Research and Development, Corvallis, Oregon. The statistical training provided a tool for data analysis of data developed under a probabilistic design. Projects whose sampling stations were selected under a probabilistic design include: Kauai and Hawaii NCCA, 2010, and 2011 West Maui Priority Watershed. Given the training, Monitoring and Analysis section staff can begin analyzing data using R and be consistent with EPA analysis.

CWB will continue to work with the Division of Aquatic Resources (DAR) to the mutual benefit of both programs. CWB and DAR staff have completed the 2012 National Lakes Assessment. CWB and DAR staffs are preparing to attend the EPA National Rivers and Stream Assessment (NRSA) training and will participate in the Hawaii portion of the National Rivers and Stream Assessment to be held in FY2013 and FY2014. The assessment will be done at 50 stream sites under a probabilistic design on the island of Kauai.

CWB will continue collaborating with other agencies and organizations: Great Lakes Beach Association (Beachnet), United States Geological Survey (USGS), University of Hawaii (UH), John A Burns School of Medicine (JABSOM), Pacific Research Center for Marine Biomedicine, Surfrider Foundation Hawaii Chapters, Beachnet, and Hanalei Watershed Hui. CWB will also keep close ties with specific individuals such as: Dr. Alexandria Boehm, Stanford University; Dr. Yuanan Lu, UH Office of Public Health Studies; Dr. Tao Yan, UH School of Civil and Environmental Engineering; Dr. Stephen Siefried, JABSOM; and Dr. Marek Kirs, UH Water Resources Research Center (WRRC) to keep updated on the latest research in surface water monitoring. CWB will be discussing with Surfrider Oahu Chapter on the possibility of assisting the CWB with Brown Water Advisories at the April 2013 chapter meeting.

Surfrider members living on the North shore and Waianae coast could update CWB on coastal conditions during and after a storm event. Basically Surfrider Oahu Chapter will be acting as our eyes and ears on coastal conditions.

FY2014

Priority will be BEACH Monitoring and Notification (until funds dry up), completion of Lahaina Seep sampling and qPCR work at Hanalei, Nawiliwili, and Lahaina by December 30, 2013. Reassess beach monitoring post BEACH funding. CWB, DAR, and private contractor assistance will continue the NRSA on Kauai and begin report writing in FY2014. Monitoring will continue to provide TMDL, 303d Impaired Waters, and WQ Standards support.

CWB will continue collaborating with other agencies and organizations: Great Lakes Beach Association (Beachnet), United States Geological Survey (USGS), University of Hawaii (UH), John A Burns School of Medicine (JABSOM), Pacific Research Center for Marine Biomedicine, Surfrider Foundation Hawaii Chapters, Beachnet, and Hanalei Watershed Hui. CWB will also keep close ties with specific individuals such as: Dr. Alexandria Boehm, Stanford University; Dr. Yuanan Lu, UH Office of Public Health Studies; Dr. Tao Yan, UH School of Civil and Environmental Engineering; Dr. Stephen Siefried, JABSOM; and Dr. Marek Kirs, UH Water Resources Research Center (WRRRC) to keep updated on the latest research in surface water monitoring.

Since The National Beach Conferences will be stop, it would be to beneficial to Hawaii to continue attending a conference that addresses beach monitoring issues. There are two conferences that should work: New England Association of Environmental Biologist Conference and the Great Lakes Beach Association Conference (Beachnet). Attending one of these conferences would keep Hawaii updated to the latest research in beach monitoring issues.

Total Maximum Daily Load (TMDL):

FY2013

The Clean Water Branch filled the TMDL Coordinator position in January 2012 and is moving forward with TMDL efforts by collaborating with other sections within the CWB and establishing positive working relationships with stakeholders. Future TMDLs will be developed by working closely with Polluted Runoff Control and permitting and by partnering with other government agencies at the state and county levels. We are continuing to meet with the City and County of Honolulu Department of Environmental Services and State DOT to discuss TMDL development and inviting them to participate in future TMDL developments in areas where they may be affected.

The current status of previous TMDL contracts/efforts is briefly summarized below.

Kaelepulu: Contract deliverables provided by Clyde Tamaru in December 2011 and March 2012 were assessed and it was found to be lacking and final payment was cancelled. CWB has also recently loaned sampling equipment to Oceanit in order to provide additional data for the work they are currently conducting in Kaelepulu for the City and County.

Waikale: The modeling approach (HSPF) used by DOH for Waikale is now being adopted by the City and County of Honolulu to analyze BMP effectiveness in this watershed. C&C will repurpose data collected for the WARMF model that they had been developing for use in the HSPF model. No further TMDL resources are being utilized in this watershed at this time. Northwest Hydraulics will continue with the HSPF model in the Waialua- Kaiaka and Ala Wai watersheds for the C&C of Honolulu.

General Updates: Staff from the Permitting, Enforcement and Monitoring sections have been working together with permit holders to implement the waste load allocations (WLAs) in existing TMDLs via permit requirements. Future TMDLs will be developed with implementation in mind, making the transition from WLAs to permit conditions smoother and more straightforward.

FY2014

Hilo: TMDL efforts will continue to focus on the Hilo Bay watershed for FY14. Existing Hilo data will be reassessed using the new decision units and any potential data gaps will be identified in order to guide the next steps for TMDL development. We intend to partner with researchers at UH Hilo to support microbial source tracking work that is occurring through 2014 in Hilo Bay. This work will support TMDL research and also lend supportive weight to the Brown Water Advisories through data collection and the use of simple modeling techniques. Further monitoring may be required to verify the condition of current 303(d) listed waters in the watershed.

Water Quality Standards

FY2013

HAR 11-54 will be amended to allow the Test of Significant Toxicity (TST) for toxicity monitoring of effluents covered under NPDES permits, in addition to the existing test criteria. The general policy of water quality antidegradation will be amended to include antidegradation language consistent with the federal policy. Data from the Hawaii Health Survey will be evaluated for fish consumption in Hawaii. The data will be used to review and possibly update the numerical standards for toxic pollutants in HAR 11-54-4. The Clean Water Branch Quality Assurance Program Plan (QAProgP) and related Quality Assurance Project Plans (QAPP) and Standard Operating Procedures (SOP) will be updated, finalized and submitted for EPA approval as needed.

FY2014

Open an internal discussion on the possibility/feasibility of creating a more detailed State Water Quality Standards map showing all water bodies and their classification and to definitively identify all water bodies which encompass or include sanctuaries, refuges, reserves, preserves, critical habitats, etc. and to provide the Director of Health with the authority to determine which water bodies will be added to the more restrictive water body list (Class 1 inland waters and Class AA marine waters). Currently, it may be interpreted in HAR 11-54, that all new sanctuaries, refuges, reserves, preserves, critical habitat, etc. established by the Department of Land and Natural Resources will automatically be included in restrictive water body classifications.

303(d)/305(b) Integrated Report

FY2013

For FY 2013, CWB will put out an open call for data by April 1, 2013 for the 2014 Integrated Report. Data acceptance will be closed November 30, 2013.

CWB is going through the interview process to fill the current vacant Impaired Waters position. CWB has gone through the internal list but found the candidate lacking in water monitoring and data management skills. CWB has asked for an outside list and will interview immediately to fill the vacancy.

FY2014

Data for 2014 IR will be accepted until November 30, 2014, a draft will be submitted to EPA by January 15, 2014, public notice draft February 15, 2014 for 30 days, close comment period on March 15, 2014, respond to comments and submit final 2014 IR to EPA for approval by April 30, 2014.

II PROGRAM WORK PLANS

| A. Federal Grant Administration - CWA 106 (Surface Water) | | | | | |
|--|---|---|--|-------------------------------------|---|
| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
| <i>Federal Grant Administration</i> | <i>Timely award of federal grants</i> | <i>1) Draft work plan, consistent with proposed outcome format</i> | <i>April 2012, 2013</i> | CWB-A. Wong | |
| | | <i>2) Grant negotiations</i> | <i>May 2012, 2013</i> | | |
| | | <i>3) Approved final grant application, work plan to EPA</i> | <i>June 2012, 2013</i> | | |
| | | <i>4) EPA award of grant</i> | <i>w/in 30 days of fund availability</i> | | |
| | <i>Timely submittal of reports on workplan accomplishment and program outcomes</i> <i>Outcome:</i> <i>Reports will be used to document satisfactory progress and issues needing further attention and funding in the next year work plan.</i> | <i>1) Quarterly and annual reports on all program outcomes and work plan activities (per specific program requirements)</i> | <i>Dec., March, June, September 2012, 2013, 2014</i> | All ERO/EMD (Manager/Sec) | FY13 Fiscal Sheet Page 1 of 18 |
| | | <i>2) Interim/Final FSRs within 90 day grant expiration.</i> | <i>Nov. 2013, 2014</i> | ERO | FY14 Fiscal Sheet Page 1 of 18 |
| | | <i>3) Specific Program Reporting to be added for each program.</i> | <i>Annually, Dec. 31</i> | CWB staff | |
| | | <i>4) Financial Terms and Conditions Reports, as appropriate.</i> | <i>Annually, Dec. 31</i> | ERO | |

| B. NPDES Permits - Funded under CWA 106 | | | | |
|---|---|---------------------------------------|-----------|-----------------------------|
| Goal 2: Safe and Clean Water - Ensure drinking water is safe. Restore and maintain oceans, watersheds, and their aquatic ecosystems to protect human health, support economic and recreational activities, and provide healthy habitat for fish, plants, and wildlife. | | | | |
| Objective 2.2: Protect Water Quality - Protect the quality of rivers, lakes and streams on a watershed basis and protect coastal and ocean waters. | | | | |
| Subobjective 2.2.1 Protect and Improve Water Quality on a Watershed Basis - Number of the Nation's watersheds where: water quality standards are met in at least 80% of the assessed water segments; and all assessed water segments maintain their quality and at least 20 percent of assessed water segments show improvement above conditions as of 2002. (2,262 watersheds nationwide) | | | | |
| State Program Indicators (To be added by State) | | | | |
| HI PROGRAM OBJECTIVE NO. 1 Control point source discharges through the issuance of appropriate NPDES permits to maintain the beneficial uses of the State receiving waters. HI PROGRAM OBJECTIVE NO. 2 Certify that Section 404 permitted activities will not adversely impact the beneficial uses of the State receiving waters. | | | | |
| EPA/State Core Performance Measures | CWB Strategic Plan - Program Performance Objectives/Measures | Target | Due Date | Result, Date Done, Comments |
| Permitting Program Outcome/Output Measures | A. NPDES permit program: | | Quarterly | |
| | 1. Report # of individual NPDES permits issued. | A.1. See Attachment 2 | | |
| | 2. Report # of Notices of General Permit Coverage (NGPCs) issued. | A.2. Varies with number of applicants | | |
| Permitting Program Outcome/Output Measures | B. COE 404 permitted activities do not impair designated uses. 1. Report # of 401 WQCs certifications issued, waived, or denied. | B.1. Varies with number of applicants | Quarterly | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|---|--|-------------------------------------|--|
| Permitting | <p>Control point source discharges through the issuance of appropriate NPDES permits in order to maintain the beneficial uses of State receiving waters</p> <p>Outcome: 90% or more of Hawaii's NPDES permits will be current</p> <p>EPA contractor assistance</p> | <p>FY13</p> <p>Re-issue two (2) major individual permits, re-issue seven (7) minor individual permits, re-issue/administratively extend approximately 1300 NGPCs, and issue three (3) new minor individual permits according to the Permit Issuance Schedule. (See Attachment 2.)</p> | 9/30/2013 | CWB-Engineering Section | FY13 Fiscal Sheet page 1 |
| | | <p>FY14</p> <p>Re-issue three (3) major individual permits and re-issue eleven (11) minor individual permits according to the Permit Issuance Schedule. (See Attachment 2.)</p> | 9/30/2014 | | FY14 Fiscal Sheet page 1 |
| | | <p>In lieu of Section 106 surface water funds, Hawaii DOH requests in-kind assistance from EPA in the form of contractor services to assist with NPDES permit development. It is more time-efficient for EPA rather than the State, to procure these contractual services. (\$94,951 in FY13 and \$20,000 in FY14).</p> | <p>FY13-9/30/2013</p> <p>FY14-9/30/2014</p> | | \$94,951 in FY13 and \$20,000 in FY14 in-kind service request for permit development assistance from contractor. |
| | | <p>EPA will provide for Hawaii DOH review and comment on all in-kind contract support work orders to ensure the proposed tasks, milestones, and schedules provide a reasonably standardized approach to permit preparation and meet Hawaii DOH support needs. To the extent in-kind contract service work orders contain specific workplans and schedules concerning specific permit development tasks, Hawaii DOH staff will provide necessary permit related information and materials to contractors, and review and comment on contractor interim deliverables, in accordance with the schedules set forth in the contract work orders.</p> | | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|--|---|-----------------------------------|---|---|
| | | <p>If it is infeasible to meet the schedules established in the work orders, Hawaii DOH will notify EPA and the contractor immediately of any delays and its revised schedule for providing the necessary materials or review. EPA reserves the right to direct the contractor to complete permit development work products without benefit of reviews of interim deliverables if the State does not meet schedules for providing those reviews.</p> <p>Any permit still under development at end of previous fiscal year will be issued or reissued.</p> | | | |
| | To issue and update individual and general NPDES permits | <p>See Attachment 2 for FY 2013-14 Update 5 year plan in Attachment 2 annually Maintain and update inventory of industrial activities</p> <p>Develop and maintain a data base of industrial facilities claiming conditional "no exposure" exclusion from obtaining a storm water permit.</p> | <p>9/30/2013</p> <p>9/30/2014</p> | | |
| | Public Notification | Provide public notification of construction storm water Notices of Intent for projects greater than 20 acres on the island of Hawaii in the Clean Water Branch's WEB site at http://hawaii.gov/health/environmental/water/cleanwater/pubntcs/index.html | | | |
| | Wastewater Sludge | The State will add the agreed-upon sludge "boilerplate" monitoring/reporting language to all reissued NPDES permits and will also add, when requested and provided by EPA, specific language on a case-by-case basis. | As required | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|--|---|-------------------------------------|--|
| | Public Notification | In addition to issuing Notices of Proposed Permit Issuance for individual permits and individual 401 Water Quality Certifications in the newspapers of the County where the discharge is located, the State will provide public notification in the Clean Water Branch's WEB site at: http://hawaii.gov/health/environmental/water/cleanwater/pubntcs/index.html | | | |
| | CAFO inventory | The State will update its AFO/CAFO inventory and permit CAFOs that are identified as having discharges to State waters. In addition, all permitted CAFOs will be required to have nutrient management plans and other applicable management measures as required in the effluent guidelines. | As required | | |
| | Sec. 401 Water Quality Certification | The State will continue to implement a State Section 401 Water Quality Certification Program for applicants required to have a federal permit or license to construct in waters of the State. | As required | | |
| | <p>Continue development and implementation of HI-NPDES Water Pollution Control (WPC) Database which is compatible with EPA ICIS-NPDES system.</p> <p>The HI-NPDES WPC database provides the mechanism for effective management of the NPDES program. It supports all business areas of the NPDES program, including the following:</p> <ul style="list-style-type: none"> ■ Permitting (Tracking and Issuance) ■ Compliance Monitoring ■ Program Management (Compliance Determination) ■ Enforcement (Administrative, Criminal, and Judicial) | <p>HI-NPDES WPC Database maintenance and improvement.</p> <p>Mobile field inspection application utilizes tablet devices in the field to gather, capture and transfer data in a consolidated fashion.</p> | <p>October 2012 to September 2014</p> <p>October 2012 to September 2014</p> | CWB | <p>Federal FY13 - \$30,000 FY14 - \$30,000</p> |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|--|---------------------|-------------------------------------|---|
| | <p>The HI-NPDES WPC database allows electronically submission of NPDES application, DMR and potential automatic electronic transmittal of data to EPA ICIS-NPDES system.</p> <p>The HI-NPDES database provides better QA/QC of data input and tracking.</p> | | | | |
| Data Quality | Ensure that data gathered and used under the NPDES program is of sufficient quality to support program objectives | Revision to the QAPP if any, follow the Quality Management Plan (QMP). | Ongoing as required | CWB | |

| C. Monitoring - Funded under CWA 106 | | | | | |
|--|---|--|----------|---|---|
| Goal 2: Safe and Clean Water - Ensure drinking water is safe. Restore and maintain oceans, watersheds, and their aquatic ecosystems to protect human health, support economic and recreational activities, and provide healthy habitat for fish, plants, and wildlife. | | | | | |
| Objective 2.2: Protect Water Quality - Protect the quality of rivers, lakes and streams on a watershed basis and protect coastal and ocean waters. | | | | | |
| Subobjective 2.2.1: Protect and Improve Water Quality on a Watershed Basis - Number of the Nation's watersheds where: water quality standards are met in at least 80% of the assessed water segments; and all assessed water segments maintain their quality and at least 20 percent of assessed water segments show improvement above conditions as of 2002. (2,262 watersheds nationwide) | | | | | |
| PROGRAM OBJECTIVE NO. 3 Enhance the ambient Water Quality Monitoring Program to identify impaired bodies and restore their beneficial uses. | | | | | |
| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
| Emergency Response, Public Safety, and Surveillance Monitoring | Protect the people of Hawaii and the environment through an appropriate WQ monitoring and warning system. Public health and safety will be served and the environment will be protected. | 1. Responses to treatment plant spills and bypasses and various other kinds of accidental or emergency discharge of pollutants to surface waters. | Ongoing | CWB Monitoring Section and Enforcement & Compliance Section | Fiscal Sheet Page 1 of 18 |
| | | 2. Respond to polluted runoff events. | | State Laboratories-Environment Branch | |
| | | 3. Complaints Response and Enforcement: respond daily to citizens' complaints of water quality problems in surface waters. | | | |
| | | 4. 401 WQC Compliance Inspections: attend pre-construction meetings; conduct compliance inspections; respond to citizens' complaints on construction projects. | | | |

| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|--|--|---|--|---|---|
| Core Monitoring of Surface Waters | Monitor core set of long term stations identified by the 1999 edition of the surface water Quality Management Plan (QMP) and water quality assays of Hawaiian coastal waters. (See Comprehensive Monitoring Strategy for the State of Hawaii) Sustained collection of historic water quality data in key locations. | Monitor core stations and major embayments on each island for the following parameters: Ammonia, Nitrate, Total N, Total P, Chlorophyll a, Silica, TSS Core stations are: Oahu: Kaneohe, Pokai Maui - Kahului Hawaii – Hilo Kauai - Nawiliwili and Port Allen Major embayments are: Kaneohe, Hilo, Nawiliwili, Port Allen, Kahului, and Pokai. Monitoring data collected at long-term monitoring stations will be entered into STORET/WQX monthly. | On hold due to reduction in force | CWB-Monitoring Section State Lab - Chem and Micro. | |
| Data Analysis and Reporting | Utilize modern technology to further the integration and availability of environmental data to all customers of DOH data. All customers of DOH data will have easy access to information. | 1. DOH will submit Draft FY2014 Integrated 303(d)/305(b) Report. - Public review of draft report - Close comment period - Submit final 2014 IR to EPA for approval | January 15, 2014 February 15, 2014 April 1, 2014 April 30, 2014 | CWB | Federal: 3- persons State: 4-persons |
| | | 2. STORET data management input/output of data on all watershed projects, TMDLs, Integrated Report, etc. | Quarterly | CWB | |

| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|---------------------|--|--|--------------------------------|--|---|
| | | 3. NHD stewardship will edit high-resolution NHD data for Hawaii, which is available via USGS website. | Completed | RCUH-Geospatial Information Specialist | FY13 -\$60,000 |
| | | NHD & GNIS Maintenance – Update feature names & coordinates | Ongoing | | FY14 - \$22,842 |
| | | Geo-referencing of State water quality assessment and impairment decisions | Completed | | |
| | | Finalize assessment unit designations for State water quality reporting | Completed | | |
| | | 4a. Input 2012 Integrated Report entry in ADB. | Completed | RCUH-Geospatial Information Specialist | |
| Data Quality | 1) Ensure that data gathered and used under the NPDES program is of sufficient quality to support program objectives | Revisions to the CWB QAPP follow the Quality Management Plan (QMP). | Ongoing as required | CWB | |
| | | Respond to any comments resulting from EPA QA Office of draft CWB QAPP (submitted 5/7/12). | 60 days after review completed | CWB | |
| | | Final CWB QAPP to EPA | 90 days after review completed | CWB | |

| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|----------------------|---|--|---|-------------------------------------|---|
| Inland Waters | Collect and assess data on inland waters to determine water quality. | National Lakes Assessment | Completed | CWB Monitoring Section | MI funds |
| | | National Rivers and Stream Assessment | FY2013-14 | CWB Monitoring Section | MI funds |
| | | Attend NR&S Assessment training at Folsom, California | April 2013 | CWB Monitoring Section | MI funds |
| | | Develop draft QAPP for inland waters include supporting SOPs | 3/31/13 | CWB Monitoring Section | |
| | | Submit final QAPP for inland waters and supporting SOPs | 60 days after receiving EPA QA Office review of draft | CWB Monitoring Section | |

| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|------------------------------|--|---|----------|---|---|
| Watershed Assessments | Collect and assess data on a watershed basis in an effort to determine sources of watershed pollution and develop means to improve water quality. Improved water quality by watersheds. | Analyze existing and readily available surface water data and related information (e.g. complaints, spills, inspections), waterbody assessment priorities and listing criteria, and DOH program capabilities to prepare recommendations for: a. Water quality sampling by the CWB Monitoring and Assessment Section; b. Bed sediment and fish tissue sampling and fish risk assessments conducted by HEER, and CWB; c. Assessments of stream habitat quality and biological integrity. d. Water quality sampling (surface and ground) and SWAP enhancement to address Clean Water Act and Safe Drinking Water Act integration measures. e. Achieving other assessment goals and objectives through volunteer monitoring, grantee monitoring (e.g. 319 projects), compliance monitoring (e.g. 401, NPDES, and SEP conditions), and third-party independent monitoring (e.g. academic and scientific research) | Ongoing | CWB Monitoring Section State Lab.- Chem and Micro. | Federal: 3 persons |
| Community Involvement | Utilize community and regulated community input in developing environmental goals, objectives, statutes and rules to ensure that the public is educated, aware, and in synch with the environmental management programs. | Conduct public outreach and education activities to promote waterbody monitoring and assessment, data quality, and comparability of data with State water quality standards, and assist other DOH programs, government agencies, scientists, schools, community groups, and individuals with surface water data collection, analysis, and interpretation Work with already existing organizations that affect policy (neighborhood boards, community association) to ensure public input. Promote Leadership in Energy and Environmental Design (LEED) programs and community-based social marketing. | Ongoing | CWB CWB | |

| Program Objective | Program Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|---|--|---|----------------------------|-------------------------------------|---|
| TMDL Development and Approval TMDLs under development: Hilo Bay watershed Kaelepulu inland waters Pearl Harbor Streams: Waikele Streams | Completion of TMDLs to provide scientific basis for load Allocation (LA) and Waste Load Allocation (WLA) that must be implemented to achieve WQS. All data collected for TMDL development will be entered into STORET or another appropriate electronic format. | 1. HIDOH contract for water quality assessment and general TMDL development. Reviewing existing data and discussions with Dr. Tracy Wiegner of UH, Hilo. Reassess data with new decision units and support MST by UH Hilo. | 10/12-09/13 Ongoing | CWB | FY13-\$30,000 FY14-\$30,000 |
| | | 2. Review Kaelepulu data collected by Clyde Tamaru. Deliverables from Clyde Tamaru were found to be lacking and last payment of \$25,000 was withheld. | Completed | CWB | |
| | | 3. Hilo Bay Watershed TMDL Development - Collect and analyze existing data - Identify criteria and uses - Identify data gaps - Identify and contact stakeholders - Develop monitoring plan - Determine contract or in-house monitoring - Initiate monitoring | Ongoing | CWB | |

| | | | | | |
|--|--|--|---------|--|--|
| | | 4. Pearl Harbor Waialeale Stream C&C has abandoned WARMP model and will use HSPF model to analyze BMP effectiveness. C&C will use Northwest Hydraulics HSPF model at Ala Wai, Kaiaka, and Wailua. No additional TMDL resources being utilized in this watershed at this time. | Ongoing | | |
|--|--|--|---------|--|--|

| Water Quality Standards | | | | | |
|---|---------------------------|-------------|----------|-------------------------------------|---|
| Goal 2: Safe and Clean Water - Ensure drinking water is safe. Restore and maintain oceans, watersheds, and their aquatic ecosystems to protect human health, support economic and recreational activities, and provide healthy habitat for fish, plants, and wildlife. | | | | | |
| Objective 2.2: Protect Water Quality - Protect the quality of rivers, lakes and streams on a watershed basis and protect coastal and ocean waters. | | | | | |
| Subobjective 2.2.1 Protect and Improve Water Quality on a Watershed Basis - Number of the Nation's watersheds where: water quality standards are met in at least 80% of the assessed water segments; and all assessed water segments maintain their quality and at least 20 percent of assessed water segments show improvement above conditions as of 2002. (2,262 watersheds nationwide) | | | | | |
| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-------------------------|--|---|-------------------------|-------------------------------------|---|
| Water Quality Standards | -Review and amend water quality standards. | Amend to allow the Test of Significant Toxicity (TST) for toxicity monitoring of effluents. Evaluate Hawaii Health Survey for possible update to numeric standards for toxic pollutants | FY13 | CWB | |
| | -Develop the strategic plan for development of Biocriteria for inland waters. | Review USGS report: Development of Invertebrate Community Indexes of Stream Quality for the Islands of Maui and Oahu, Hawaii, EPA National Lakes Assessment and National Rivers and Streams Assessment Protocols. | FY13/14 | CWB | |
| | -Conduct internal, intergovernmental, and public education/outreach about the meaning and application of the WQS | Update WQ Standards Map to show all waterbodies and their classification and definitively identify all waterbodies (sanctuaries, refuges, reserves, critical habitats, etc.) to provide the Director of Health with the authority to determine which waterbodies will be added to more restrictive waterbody list (Class 1 inland and Class AA marine waters). Currently, it can be interpreted that all new sanctuaries, refuges, reserves critical habitats, etc., established by DLNR will automatically be included in restrictive waterbody classifications. | Ongoing FY13 FY14 | CWB | |

| D. Compliance/Enforcement/Inspections - Funded under CWA 106 | | | | | |
|--|---|---|-------------------------|--|---|
| Goal 5: Compliance and Enforcement Stewardship – Improve environmental performance through compliance with environmental requirements, preventing pollution, and promoting environmental stewardship. | | | | | |
| Objective 5.1: Improve Compliance. | | | | | |
| Sub-objective 5.1.3 Monitoring and Enforcement. | | | | | |
| HI Program Objective No. 4 Ensure expeditious compliance with State Water Pollution rules. | | | | | |
| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
| General Compliance | Achieve compliance rate of 98% for NPDES facilities | Implement the State's Annual Inspection Plan. Track and evaluate NPDES reported self-monitoring. Take timely and appropriate enforcement action against violators | Ongoing. | CWB- Enforcement and Compliance Section, Attorney General's Office | Fiscal Sheet Page 1 of 18 |
| Data Quality | Ensure that data gathered and used under the NPDES program is of sufficient quality to support program objectives | Revisions to the QAPP follow the Quality Management Plan (QMP). Enforcement DMR draft QAPP has been submitted to EPA on March 2012. CSI QAPP will be submitted when CSI starts | Ongoing, or as required | CWB | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|--|--|-------------------------------------|---|
| ICIS-NPDES | To perform data input into ICIS-NPDES in accordance with the procedures outlined in the 1985 OCS Quality Assurance Guidance Manual, and the December 28, 2007 ICIS Addendum to Appendix C of the PCS Policy Statement defining the minimum ICIS-NPDES data elements comparable to PCS WENDB and other system-required ICIS-NPDES data elements. | (1) Enter timely and accurate for all NPDES applications and permits consisting of all applicable information from enforcement orders issued by the DOH. | (1): Within 15 days of receipt. | | |
| | | (2) Enter NPDES inspection information for inspections conducted by the DOH. | (2): Within 30 days of the inspection. | | |
| | | (3) Enter effluent limits, monitoring and report requirements for NPDES permittees. | (3): Within 15 days of permit effective date. | | |
| | | (4) Generate and distribute "preprinted" Discharge Monitoring Reports (DMRs) for permittees. | (4): As necessary to keep permittees supplied. | | |
| | | (5) Enter timely and accurate NPDES DMR data as reported on the DMR forms by NPDES permittees. | (5): Within 15 days of receipt. | | |
| | | (6) Enter and maintain data for General permits and enrollees (new NOIs). | (6): Ongoing, or as required | | |
| | | (7) Meet the new data requirements for ICIS-NPDES including non-major, CAFO and SSO data. | (7): Ongoing, or as required | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---------------------------|---|---|---|---|
| | | (8) Generate the automated QNCR report. | (8): Within 45 days of the end of the calendar quarter. | | |
| | | (9) Regularly perform QA checks for DMR data completeness on ICIS and follow up on missing data as needed. Report to EPA quarterly on DMR data completeness in ICIS-NPDES. | (9): Concurrent with the QNCR. | | |
| | | (10) Participate in EPA ICIS-NPDES workgroups. | (10): Ongoing, or as required. | | |
| | | (11) Participate in annual ICIS-NPDES meetings and trainings. | (11): Ongoing, or as required | | |
| | | (12) Enter into ICIS-NPDES applicable WENDB data for each formal or informal enforcement action taken against major and minor NPDES facilities, NGPC enrollees, and non-filers. | (12): within 30 days of issuance of enforcement action. | | |
| | | (13) Single Event Violation (SEV) data entry reporting, Informal enforcement action data entry reporting | | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|---|---|-------------------------------------|---|
| Inspections | Development of an Annual Inspection Plan to identify compliance problems. Region 9 may consider revising the measure of the State's inspection accomplishments if DOH demonstrates that extraordinary or unexpected circumstances prevent it from being able to carry out its workplan requirements. DOH will explain in detail such circumstances in writing. Such circumstances might include emergency response activities, work on major enforcement cases, or other reductions in staff available to carry out the required inspections. | <p>(1) Develop an inspection plan that is based on the state's environmental priorities and conforms with EPA's Compliance Monitoring Strategy (2/28/08). The plan shall provide that:</p> <p>A) For FY13 50% of the individual major permit enrollees (9 facilities), at least 20% of the traditional minor permit enrollees (6 facilities), at least 10% each of the total industrial storm water general permit enrollees (NGPC Appendix B (18 facilities) & NGPC Appendix C Phase I (105 facilities; however, EPA and DOH have agreed upon 15 facilities)), at least 5% each of the total storm water construction Phase II permit enrollees (2 facilities), and three (3) Phase II minor MS4s are to be inspected.</p> <p>For FY14 50% of the individual major permit enrollees (9 facilities), at least 20% of the traditional minor permit enrollees (6 facilities), at least 10% each of the total industrial storm water general permit enrollees (NGPC Appendix B (18 facilities) & NGPC Appendix C Phase I (105 facilities; however, EPA and DOH have agreed upon 16 facilities)), at least 5% each of the total storm water construction Phase II permit enrollees (2 facilities), and two (2) Phase II minor MS4s are to be inspected.</p> <p>B) A significant number (more than 50%) of the CEIs and CSIs to be conducted on major and minor permits shall be unannounced;</p> <p>C) Follow-up inspections are not to be counted towards the State's totals; however, the inspections will be entered into ICIS-NDPES.</p> <p>Inspections of traditional minor facilities shall be timed to be completed approximately 6 months before the NPDES permits are issued/renewed.</p> <p>Inspections shall be prioritized in the priority watersheds. All inspections performed in a designated priority watershed shall be noted/tracked in ICIS-NPDES.</p> <p>The inspection plan shall be submitted as an MS Excel spreadsheet that identifies, for each universe of inspection required under the CMS, the number of proposed inspections.</p> <p>Incorporate pollution prevention/waste minimization activities into inspections.</p> | <p>FY13 October 31, 2012</p> <p>FY14 October 31, 2014</p> | | |

FY 2013-FY2014 CWA Base 106 Workplan
 April 25, 2013

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|---|------------------------|---|---|
| Inspections | To verify compliance with all active NPDES permits, consent agreements and decrees. | (2) CCH, Hawaii Department of Transportation, and Maui County consent decrees: Inspect as needed to determine compliance with the consent decree. | Ongoing or as required | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---------------------------|---|------------------------|-------------------------------------|---|
| | | <p>(3) NPDES inspections will include, but not be limited to, the following activities concerning compliance with permit limitations and conditions:</p> <p>a) Verification of record keeping and reporting as outlined in Section 3 of the NPDES Compliance Inspection Manual (EPA 300-B-94-014).</p> <p>b). A physical inspection of the facility, including unit processes and operations and receiving water observations, as outlined in section 4.B of the NPDES Compliance Inspection Manual (EPA 300-B-94-014).</p> <p>c). An evaluation of operations and maintenance programs as outlined in section 4.C of the NPDES Compliance Inspection Manual (EPA 300-B-94-014).</p> <p>d). An evaluation of facility compliance sampling activities, including: adequacy of sampling, methodology and locations; sample preservation, containers and hold times; flow measurement; and compositing techniques, as outlined in sections 5 and 6 of the NPDES Compliance Inspection Manual (EPA 300-B-94-014).</p> <p>e). An evaluation of laboratory procedures (or verification of current lab certification) and laboratory quality assurance procedures (if analyses are done on site), as outlined in Section 7 of the NPDES Compliance Inspection Manual (EPA 300-B-94-014).</p> | Ongoing or as required | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---------------------------|--|---|-------------------------------------|---|
| Inspections | Inspection Reports | (4) The inspection reports will discuss the findings related to all of the above activities and the field inspection notes will support all of the inspection report findings. | | | |
| | | (a) Inspection reports shall be sent to EPA within 30 days of the inspection date, and shall be accompanied by a copy of the report transmittal letter to the permittee. Applicable WENDB data will be entered into ICIS-NPDES within the same time frame. | 4(a) Ongoing, within 30 days of date of inspection. | | |
| | | (b) DOH shall report to the EPA after the end of the each quarter the following information relating to inspections conducted in the quarter: (1) Identification of by name, permit number, permit type [i.e. major municipal, major non-municipal, major Federal, minor, construction storm water Phase I and Phase II (NGPC Appendix C), or other industrial storm water (NGPC Appendix B], and date of each NPDES facility inspected in the quarter; (2) For each of the above indicated inspections indicate which were announced, unannounced, and whether inspections included sampling (3) Copies of the inspection reports are to be included in the quarterly reports. (4) Copies of quarterly reports are to be e-mailed to Region 9, CWA Compliance Office. | 4(b) Quarterly, with a report due by the 15 th of the month following the quarter | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---------------------------|---|--|-------------------------------------|--|
| Inspections | EPA Contract Services | (5) In lieu of Section 106 surface water funds, Hawaii DOH requests in-kind assistance from EPA in the form of contractor services to conduct compliance inspections of select POTWs and industrial facilities. It is more time-efficient for EPA rather than the State, to procure these contractual services. Time consuming joint enforcement actions prevent DOH from conducting these inspections. (\$100,000 in FY13 and \$100,000 in FY14). Inspections conducted by contractors to the State will count towards the State's totals. | Propose list of candidate inspections to EPA by 10/30/12 (FY13) and 10/30/13 (FY14). Complete all inspections by 6/1/13 (FY13) and 6/1/14 (FY14). All draft inspection reports to be submitted by the contractor to DOH by 6/30/13 (FY13) and 6/30/14 (FY14). All final inspection reports shall be transmitted to the facility (with copies to EPA) by no later than 9/30/13 (FY13) and 9/30/14 (FY14). | CWB Enforcement Section | FY13-\$100,000 FY14-\$100,000 EPA in-kind assistance Refer to CWB Budget Details-Federal Funds (Budget Sheet page 13 of 18) |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|----------------------|---|---|---|-------------------------------------|---|
| Compliance Assurance | To achieve and maintain high levels of compliance in the NPDES program to be tracked through ICIS-NPDES | (1) Prepare Quarterly Non-Compliance Reports (QNCR) via ICIS-NPDES for major dischargers. (a) No permit will remain in non-compliance for the same violation on two consecutive QNCR without: being returned to compliance, or Having timely and appropriate formal enforcement action taken against them consistent with the DOH enforcement procedures manual and penalty policy. | (1) Within 45 days of the end of each quarter | | |
| | | (2) Prepare quarterly list of other minor discharges that are in SNC. | (2) Within 45 days of the end of each quarter | | |
| | | (3) Review Discharge Monitoring Reports (DMRs) for accuracy and violations. All DMRs will be reviewed within 30 days of receipt. | (3) On-going, as DMRs are received | | |
| | | (4) Identify and list all major and minor NPDES facilities/permits | (4) Dec. 30 | | |
| | | (5) Assist EPA in reviewing deliverables from the Hawaii Department of Transportation, CCH, and Maui County consent decrees. Conduct appropriate follow-up activities as indicated by collection system evaluations conducted to date; Initiate appropriate responses to reported sewage spills | (5) As stipulated in the consent decrees | | |
| | | (6) Prepare and submit to Region 9 a response to EPA's quarterly Facility Watch List, as applicable and consistent with program guidance and SOP's | (6) Within 30 days of issuance of the Watch List to the State | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|---|---|-------------------------------------|---|
| Enforcement | <p>1) To provide for the issuance of timely and appropriate enforcement orders and penalties required to achieve and maintain compliance consistent with DOH enforcement procedures and penalty policy.</p> <p>(2) To ensure compliance with all NPDES permits and active consent agreements and decrees.</p> | 1) Take timely and appropriate enforcement actions on all applicable violations according to the Enforcement Section's procedures manual as revised to pursuant to (1) above. Initiate or continue enforcement actions on the following priority matters: | (1 a-b): On-going or as required (i.e. QNCR/ Watch List | | |
| | | (a) Take timely and appropriate enforcement actions on all dischargers on QNCR and/or Watch List. | | | |
| | | (b) Continue to pursue formal enforcement actions against the following entities: [REDACTED] | | | |
| | | (c) Develop and implement, in consultation with EPA, an initiative to identify and take formal enforcement action against unpermitted industrial storm water dischargers (non-filers). | (1c): By September 30, 2012 | | |
| | | (d) Take action against permittees that have not participated in the DMR/QA Program for two years. All enforcement actions shall include assessment of an appropriate penalty, if any. | (1d): As appropriate, or by September 30, 2012 | | |
| | | (2) Refer to EPA for appropriate action cases where: (a) upon issuance of a State Notice and Finding of Violation and Order, the violator files for a hearing on the matter and its return to compliance will be significantly delayed pending such a hearing and (b) DOH resource limitations preclude a timely and/or appropriate enforcement response. | (2): On-going or as required | | |
| | | (3) Incorporate pollution prevention projects into enforcement settlements where feasible. | (3): On-going or as required | | |
| | | (4) Review deliverables and reports from all enforcement cases as required by the respective consent decrees and discuss adequacy with EPA. | (4): On-going or as required | | |

| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |
|-----------------|---|---|---|-------------------------------------|---|
| Enforcement | (3) Reporting on compliance status and enforcement activities | (5) Report quarterly the total number of State equivalent actions to EPA Administrative Orders issued and the number issued to POTWs for not implementing pretreatment. | (5): Within 45 days of the end of each quarter | | |
| | | (6) Report quarterly the number of major facilities addressed by formal enforcement actions against municipalities that are not complying with their schedules. | (6): Within 45 days of the end of each quarter | | |
| | | (7) Report quarterly the active State civil case docket, the number of civil referrals sent to the Attorney General, the amount of civil cases concluded, penalties assessed and collected, and the number of criminal referrals. | (7): Within 45 days of the end of each quarter | | |
| | | (8) Report quarterly the number of pretreatment State civil referrals sent to the Attorney General, the number of criminal actions filed in State courts, the number of State cases filed, and the number of administrative penalty orders. | (8): Within 45 days of the end of each quarter | | |
| | | (9) Report to EPA on a quarterly basis the status of all cases/activities described in item (2) above. | (9): Within 45 days of the end of each quarter | | |
| | | (10) Identify at mid-year and end-of-year, the number of POTWs that meet the criteria for Reportable Non-Compliance (RNC) and identify which of those POTWs have had action taken against them, which resolved the violation. Report each action taken: technical assistance, permit/program modification, or formal enforcement. Report the compliance status (RNC, resolved, pending, resolved) of each POTW as of the end of the year. | (10): May 16, and Sept. 30 | | |
| | | (11) Enter into ICIS-NPDES applicable WENDB data for each formal enforcement action (equivalent to EPA Administrative Orders and/or Administrative Penalty Orders) taken against major and minor NPDES facilities, NGPC enrollees, and non-filers. | (11): within 30 days of issuance of enforcement action. | | |

| E. Training and Technical Assistance - Funded under CWA 106 | | | | | |
|--|--|--|----------|-------------------------------------|---|
| Program Element | Program Objective/Outcome | Task/Output | Schedule | Responsible Section, Unit, or Staff | Resources Funding Source/Amount Person Months |

ATTACHMENT 1 - Clean Water Branch (CWB) Monitoring Overview

Monitoring Overview

The goal of the monitoring program is to ensure that Hawaii's coastal waters are safe and healthy for people, plants, and animals, and to protect and restore the quality of Hawaii's streams, wetlands, estuaries, and other inland waters for fish and wildlife, recreation, aesthetic enjoyment, and other appropriate uses.

To pursue these goals, the CWB Monitoring & Analysis Section has heavily committed itself to Beach Monitoring in support of the BEACH Act of 2000, collaboration with Division of Aquatic Resources (DAR) staff in basic Water Quality Monitoring, work with the University of Hawaii, School of Earth Sciences and Technology in the EPA National Coastal Condition Assessment Program and Hawaii Ocean Observing System, and work with USGS in the development of Multi-tracer approach to Wastewater and Nutrient source tracking and its application at Kealekehe, Hawaii, and Kihei and Lahaina, Maui.

CWB continues to collaborate with Division of Aquatic Resources (DAR), Department of Land and Natural Resources on issues of water quality and protecting Hawaii's aquatic resources. CWB and DAR will participate in the EPA National Lakes Assessment Workshop and conduct the Hawaii portion of the national assessment. In FY13 and FY14, DOH will participate in the EPA National River and Stream Assessment.

The University of Hawaii, School of Earth Sciences and Technology (SOEST) invited CWB to collaborate in the Hawaii Ocean Observing System (HiOOS). HiOOS is a component of the Pacific Islands Ocean Observing System (PacIOOS), which is one of 11 regional observing systems in the U.S. Integrated Ocean Observing System (IOOS). PacIOOS is being coordinated by the University of Hawaii, SOEST in partnership with the East West Center, and the University of Hawaii, Sea Grant Program with funding from NOAA. The goal of HiOOS is to seek accurate, timely and reliable information about the coastal and open ocean waters of the Hawaiian Islands.

CWB is collaborating with Dr. Tao Yan, UH College of Environmental Engineering on a WERF supported project *Concentration Dynamics of Fecal Indicators in Hawaiian Coastal and Inland Sand, Soil, and Water During Rainfall Events*. CWB supported Dr. Yan's project with \$150,000 from the Kualoa settlement.

CWB is also collaborating with Dr. Alexandria Boehm, Stanford University, College of Civil and Environmental Engineering. Dr. Boehm has provided training for Hawaii's labs in the processing of qPCR samples. Samples will be collected at Lahaina, Hanalei,

and Nawiliwili, processed in Hawaii, and shipped to Dr. Boehm for final analysis. This study will help to determine the source of high bacteria levels and assist the CWB in making assessment decisions.

CWB has worked for several years on the development of multi-tracer approach to wastewater and nutrient source tacking with USGS. Elevated bacteria counts during beach monitoring at Kualoa Beach Park revealed non-operating septic systems at the restrooms of the park. A proof-of-concept approach was developed by USGS at Kualoa and the approach was used and refined at Kealakehe, Kona to determine if the effluent from Kealakehe WWTP is impacting Honokohau Harbor. The multi tracer approach was then used at Kihei and Lahaina, Maui to detect wastewater plumes from municipal injection wells in nearshore marine waters. The Kihei/Lahaina report was published by USGS in December 2009. CWB is fine tuning the approach with pharmaceutical and qPCR testing at the Lahaina seeps and high bacteria locations at Hanalei, Nawiliwili, and other beach locations on Kauai.

CWB continues to collaborate with major recreational water stakeholders of Hawaii including: ILH and OIA High School coaches, trainers, and athletic directors, Canoe organizations (OHCRA, Hui Waa, and Na Opio), Surfrider Foundation Chapters (Oahu, Kauai, and Maui), Hawaii Visitor and Convention Bureau, Waikiki Improvement Association, and various environmental groups.

FIELD INSTRUMENT TESTS: Water samples will be collected by the CWB at each selected site during wet and dry seasons. The HydroLab® multi-parameter probe will be used; the instrument is capable of measuring temperature, pH, conductivity, and dissolved oxygen. For Beach monitoring: Hach® turbidity meter Model 2100P and HydroLab Quanta multi-parameter meter capable of reading dissolved oxygen, conductivity, salinity, pH and temperature.

DOH LABORATORY ANALYSIS: Water chemistry analyses are conducted at the DOH laboratory for physiochemical parameters listed in the State Water Quality Standards as well as silicate and ammonia nitrogen. Other analyses of interest (metals, toxics, bacteria) may be arranged on a case-by-case basis. Bacteria analyses to support the BEACH monitoring program are also conducted.

Water Quality Parameters

Field Analyses - Among the field analyses are the following:

- temperature
- pH
- dissolved oxygen

- oxygen saturation
- oxidation-reduction potential
- salinity
- turbidity
- conductivity
- light intensity PAR

Laboratory Analyses - Analyses conducted by the DOH laboratory includes the following:

- nitrate-nitrite nitrogen
- ammonia nitrogen
- total nitrogen
- total phosphorus
- silicate
- total suspended solids
- bacteria (enterococcus and clostridium perfringens)
- chlor A
- qPCR filtering
-

STORET Data Management

The CWB will input all sampling data into STORET via WQX on a monthly basis. The STORET repository will be the main source of data available to the public, and will also be the main source of marine data for the 305(b) and 303(d) reports. CWB maintains its own website which also has the capability for downloads of sampling data for the public.

ATTACHMENT 2 – NPDES Permit Issuance Schedules

PERMIT ISSUANCE SCHEDULE - FY-2013

First Quarter (October 2012 - December 2012)

- | | |
|-----------------------------|------------|
| 1. Yacht Harbor Towers AOAO | HI 0020346 |
| 2. Honouliuli WWTP*# | HI 0020877 |
| 3. Sand Island WWTP* | HI 0020117 |

Second Quarter (January 2013 - March 2013)

- | | |
|--|------------|
| 4. Kailua Regional Wastewater Treatment Plant*# | HI 0021296 |
| 5. Pearl Harbor Naval Shipyard & IMF Drydocks 1-4* | HI 0110230 |

Third Quarter (April 2013 - June 2013)

- | | |
|---|------------|
| 6. Hilo WWTP* | HI 0021377 |
| 7. Ameron Hawaii Sand Island Facility | HI 0021075 |
| 8. Island Dairy# (new CAFO, no application yet) | |
| 9. Hawaiian Cement – Halawa Quarry | HI 0000558 |
| 10. Agribusiness Development Corporation | HI 0000086 |

Fourth Quarter (July 2013 - September 2013)

- | | |
|---|------------|
| 11. Wailua Wastewater Treatment Plant*# | HI 0020257 |
| 12. Marine Corps Base Hawaii Kaneohe Bay Water Reclamation Facility*# | HI 0110078 |
| 13. DOT-HWYS MS4* | HI S000001 |
| 14. Halfway Bridge Rock Quarry and Crusher | HI 0020842 |

*MAJOR FACILITIES

#Contractor support permits

PERMIT ISSUANCE SCHEDULE - FY 2014

First Quarter (October 2013 - December 2013)

- | | |
|----------------------------------|------------|
| 1. US Army Garrison Hawaii (MS4) | HI S000090 |
| 2. Maui Ocean Center | HI 0021504 |

Second Quarter (January 2014 - March 2014)

- | | |
|---|------------|
| 3. Honolulu International Airport Small MS4 | HI S000005 |
| 4. Hawaii Army National Guard Maintenance Shops and Small MS4 on Oahu | HI S000052 |

Third Quarter (April 2014 - June 2014)

- | | |
|--|------------|
| 5. Marine Corps Base Hawaii-MS4 | HI S000007 |
| 6. Navy MS4 (Combined HI S000006 and HI S000069) | HI S000257 |
| 7. Papaikou-Paukaa WWTP | HI 0021113 |

Fourth Quarter (July 2014 - September 2014)

- | | |
|---|------------|
| 8. Napili Well "A" GAC | HI 0021661 |
| 9. Keahole Point Fish, LLC | HI 0021825 |
| 10. Kahului Generating Station*# | HI 0000094 |
| 11. East Honolulu WWTP*# | HI 0020303 |
| 12. Naval Information Operations CMD Hawaii | HI 1121156 |
| 13. City and County of Honolulu MS4* | HI S000002 |
| 14. Oahu Schools Small MS4 | HI S000003 |

* MAJOR FACILITIES

#Contractor support permits

PERMIT ISSUANCE SCHEDULE - FY 2015

First Quarter (October 2014 - December 2014)

1. Ala Wai Harbor, Waianae Harbor, Keehi Harbor/Lagoon, Sand Island
Launch Ramp Facility, Heeia Kea Harbor, Haleiwa Harbor Small MS4 (new) HI S000009

Second Quarter (January 2015 - March 2015)

2. Maalaea Generating Station HI S000004
3. Kahala Hotel & Resort HI 0021300

Third Quarter (April 2015 - June 2015)

4. Honolulu Seawater Air Conditioning, LLC (new) HI 0021842
5. Hukilau Foods (new) HI 0021829

Fourth Quarter (July 2015 - September 2015)

6. Department of Agriculture Small MS4 HI S000088
7. Hawaii Institute of Marine Biology HI 0021644
8. Agribusiness Development Corporation HI 0000086
9. Topa Financial Center HI 0021768

*MAJOR FACILITIES

PERMIT ISSUANCE SCHEDULE - FY-2016

First Quarter (October 2015- December 2015)

| | |
|----------------------|------------|
| 1. Lanai Oil Company | HI 0020958 |
|----------------------|------------|

Second Quarter (January 2016 - March 2016)

| | |
|---|------------|
| 2. Sunrise Capital, Inc. | HI 0021654 |
| 3. Marisco, Ltd. | HI 0021786 |
| 4. Ameron Hawaii Kapaa Quarry | HI 0020796 |
| 5. Kulaimano Wastewater Treatment Plant | HI 0020770 |

Third Quarter (April 2016 - June 2016)

| | |
|---|------------|
| 6. Grove Farm Water Treatment Facility | HI 0021824 |
| 7. Waianae Wastewater Treatment Plant* | HI 0020109 |
| 8. Mahaulepu Quarry | HI 0021491 |
| 9. Ewa Shaft GAC Treatment Facility (new) | HI 0021830 |

Fourth Quarter (July 2016 - September 2016)

| | |
|--|------------|
| 10. NAVFAC Wastewater Treatment Plant* | HI 0110086 |
| 11. Shipman Generating Station* | HI 0000264 |

ATTACHMENT 3 - Watershed Assessments/TMDL Program Plan

1. Program Objectives/Outcomes

A new TMDL Coordinator has been hired by the Clean Water Branch. In a re-organization move, TMDL, 303(d)/305(b) IR, and WQ Standards have been moved from the Environmental Planning Office (EPO) to the CWB, Monitoring and Analysis Section. We are checking up on contracts written by past TMDL Coordinator and making sure that deliverables have been delivered and/or a status of work is report. An inventory of equipment and its location has been completed.

The Kaelepulu contract (Conduct Water Quality Research and Extension Service for TMDL Development-Kaelepulu Watershed) is behind schedule and we are in contact with principle investigator, Clyde Tamaru, UH. Mr. Tamaru is following up on his deliverables. It was determined that a significant amount of deliverables were not delivered and CWB has withheld final payment.

The EPO stored their TMDL associated equipment at Building 4, Waimano Ridge near the DOH Laboratory. In March 2012, all equipment was moved to the CWB baseyard at Waimano Ridge. There were a lot of ISCO samplers that were sitting idle and some had Bob Bourke, Oceanit labels on them (used them previously). Rather than have these equipment sitting idle, we decided to loan Oceanit the samplers for upcoming work for the City and County of Honolulu. Their plan is to use the equipment to supplement their own for watershed water quality runoff studies. By having a large number of samplers they will be able to canvas all critical areas within a watershed to better identify the specific sources of pollutants. We ask that data obtained be shared with CWB and it was agreed. The samplers were originally bought by Oceanit with contract funds from EPO for work on another completed project. At the end of the contract, equipment was turned over to EPO.

Due to Reduction in Force in the CWB Monitoring Section, TMDL Program will always look for opportunities to share resources to produce monitoring data for mutual use. The collaboration with Oceanit is the first occasion where DOH idle equipment is being used to generate data for TMDL development. More such collaborations will be pursued in the future.
